# Milestone-3 Creation of Access Control List-READ

## Create READ ACL

1. Navigate to System Security → Access Control (ACL).
2. Elevate the Security_admin role.
3. Click New.
4. Type: record.
5. Operation: read.
6. Name: u_institution_details.
7. Active: true.
8. Advanced: true.
9. In the Requires role related list, add bb1.
10. Add Data condition: Branch is EEE.

## Script

```
(function () {
    if (gs.hasRole('admin')) {
        return true;
    }
    if (gs.hasRole('bb1')) {
        return true;
    }
    return false;
})();
```

## Verification

1. Impersonate the EEE user and open the Student Records list.
2. User with bb1 role can view EEE branch records.
3. User without the role cannot view the records.
4. Admin user can view all records regardless of branch.
